

# K-Series

Another range of metalised films conceived and developed stemming from customer feedback is the K-Series. The K-Series window films are 100% metalised films. They are cost-effective, and heat reflective but engineered to have a muted non-reflective appearance. Using proprietary technology, this series of films provides you a range of different levels of glare and heat control, characterised by its low levels of visible reflectivity.

The K-Series is suited for vehicle applications to achieve privacy without the reflectivity.

## K-Series Product Specifications

	K14	K28	K37
Total Solar Transmission	17.0%	31.0%	37.0%
Total Solar Absorption	70.0%	61.0%	55.0%
Visible Light Transmission	14.0%	28.0%	37.0%
Visible Light Reflectance	17.0%	11.0%	9.0%
Shading Coefficient	0.43	0.56	0.62
Total Solar Energy Rejection	63.0%	52.0%	47.0%
Ultraviolet Rejection	99.0%	99.0%	99.0%
